

## Abstract Interface Editor in Java/Swing

### Brief description

The tools will belong to the UsiXML development suite and enable developers to create the main user interfaces along with the application logic.

This tool will be delivered as a “Pay to use” service.

### Features

- **Edit the abstract interface:** Allow the creation of an abstract description of the interface using drag-and-drop from list of available interface components.
- **Preview inside an application:** Display a preview of the resulting concrete interface in java/swing mode.
- **Preview in a browser:** Display a preview of the resulting concrete interface in HTML.
