

## Tracks Creation Application: “UsiWalkalone”

### Brief description

This tool will enable users to create tourism tracks. The user will also have the possibility to complete the track with multimedia resources like text, audio comments, pictures and videos. With this application, everyone can create and suggest tourism tracks to other users.

This application will be available on dedicated market places (App Store, Android Market, etc.)

### Features

It will integrate the following features:

- **The UsiXML technology** to enable contextual user interface.
- **A content manager** to add multimedia content to specific places.

### Inputs

- A GPS trace

### Outputs

- A tourism tracks database

### Planned version of the tools

- 2011 – This version will run on iPhone and Android.
- 2012 – This version will be optimized for tablet usage.

### Authors

Defimedia s.a.
